

The Growing Finger

Hold the first two fingers of your left hand out in front of you, and pull the tips over to the right with your right hand. (Picture 1.)

This will make the two fingers look

about the same length. Keep them like this, and show your friends that they are equal in length. Now pull on the second finger, pretending to stretch it vigorously.

Then hold the two fingers out again, but this time point them slightly to the left. The second finger will now appear to have grown and to be longer than the first. (Picture 2.)

The Magic Clips

Attach paper clip to a strip of strong material.

Fold the material as shown and attach another clip to the fold.

Pull the material.

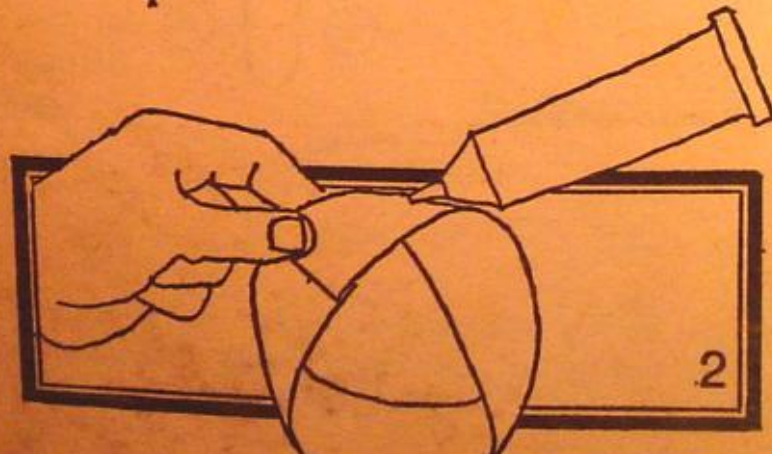

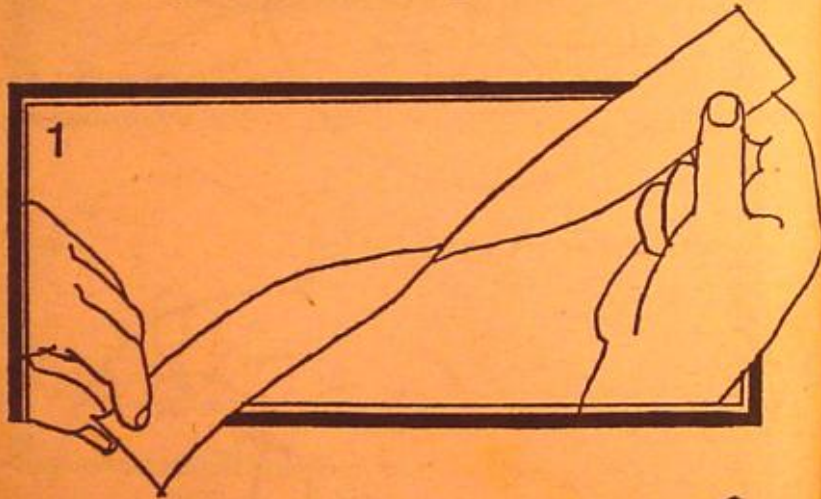

Magic

Magic rings

You will need: strip of paper, about 4 cm x 30 cm
or longer
glue
scissors

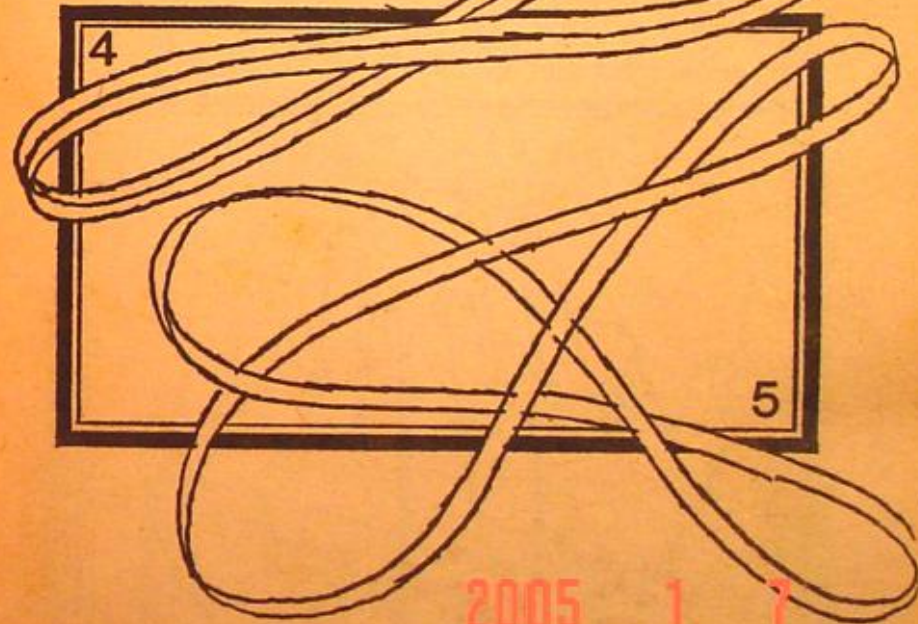

- 1 Make one complete twist in the paper strip . . .
- 2 . . . and glue the two ends together.

3 Now cut around the centre of the ring.

4 The result is not two rings, as you might have supposed, but one big ring.

Cut all the way around the centre as before. This will make an even bigger ring, won't it?

5 Wrong. This time you have made two rings.
